203-912-1689

Multi-disciplinary Product Designer with a passion for simplifying complexity through elegant, human-centered design. Experienced in leading UX strategy, developing cross-platform design systems, and aligning design with business goals. I thrive in collaborative environments where data, empathy, and product thinking intersect to create meaningful impact.

EDUCATION

BS Psychology

University of California, San Diego (UCSD)

SKILLS

Design: User Experience Design (UX), Product Design, Visual Design, Interaction Design, Information Architecture, User Research, Storytelling, Wireframing & Prototyping, Hi-Fidelity Mockups, Design Systems, Branding, Usability & A/B Testing, User Personas & Interviews, Data Visualization, Mobile Platforms, Accessibility

Tool & Platforms: Figma, Sketch, Adobe Creative Suite, Maze, Webflow, WordPress, Canva, Mailchimp, Microsoft Office, Storybook, Asana

Development & Collaboration: HTML, CSS, JavaScript, Git/Github, Responsive Design, Agile/Scrum, Cross-Functional collaboration, Design-Engineering Handoff

WORK EXPERIENCE

Design Strategist

SRA (Remote) — May 2024 – Present

- Led cross-functional collaboration between U.S.-based nonprofit leaders and India-based development teams to launch an event registration platform within a 1-month timeline
- Researched and defined brand positioning strategies to differentiate the U.S. center from its India-based counterpart
- Co-developed a comprehensive brand book in partnership with a leading marketing agency, aligning visual identity and messaging with strategic organizational goals
- Redesigned the online donation experience, improving UX and simplifying flows, which drove over \$750k in contributions through a more intuitive and emotionally resonant interface
- Work closely with stakeholders to translate high-level organizational objectives into actionable, user-centered design solutions
- Create marketing collateral (pitch decks, email templates, social media posts) that support

fundraising

- Initiate strategic conversations with leadership around long-term digital direction, helping shape future efforts in donor engagement, brand clarity, and regional growth

Senior UI/UX Designer

GroupM (Remote) — Apr 2021 – May 2024

- Led the end-to-end design for Fusion, a commerce intelligence platform that turned gigabytes of streaming retail data into actionable dashboards for enterprise clients
- Translated complex retail media insights into easy-to-use dashboards by designing wireframes and high-fidelity prototypes
- Created multiple iterations of user flows and prototypes in Figma and used design thinking principles to test and refine features in collaboration with PMs and stakeholders
- Conducted UX audits, moderated usability tests, and synthesized feedback to drive continuous improvements - leading to a 30% increase in task success rate
- Used Figma's interactive components and variants to build a unified cross-platform design system across product teams
- Collaborated daily with engineers, product managers, and data scientists in an agile environment, ensuring seamless handoffs and polished design implementation
- Shaped the product direction through research-backed design, blending customer interviews, analytics, and business goals to prioritize features with impact
- Proactively partnered with PMs to gain exposure to product strategy and roadmapping, increasing my influence on design decisions

UI/UX Designer

Beckett (San Diego) — May 2019 – Jan 2020

- Led the design of an iOS React prototype for an IoT project, visualizing oil tank metrics for current customers
- Created end-to-end user flows, wireframes, and prototypes, translating complex requirements into intuitive interfaces aligned with both the user and business goals
- Contributed to the evolution of the internal design system, applying and extending existing style guides to ensure visual and functional consistency
- Delivered low-to-high-fidelity prototypes that improved alignment across teams and accelerated development timelines
